

ANDREU ORTEGA BLASI

Product Manager | AI, SaaS & Digital Solutions

Profile

PMP-certified Product Manager with 4+ years of experience delivering digital, IoT-enabled, and AI-driven solutions across international markets. Combining a strong technical foundation with strategic business thinking, I specialize in transforming complex challenges into scalable products and actionable outcomes. Known for a servant-leadership approach, I thrive in uncertain environments by bringing structure, clarity, and alignment across cross-functional teams. I am passionate about innovation, data-driven decision making, and building collaborative relationships that enable organizations to achieve meaningful and sustainable results.

Expertise

Core Competencies

- Product Strategy & Roadmapping
- AI Product Development
- SaaS & Digital Solutions
- Stakeholder Management
- Cross-Functional Leadership
- Product Discovery & Requirements Definition
- Data-Driven Decision Making
- Market development

Technical Skills

- AI & Automation: RAG, Agentic AI, MCP, LangChain, OpenAI SDK, Claude Code
- Programming: Python, Docker, Kubernetes
- Tools: Jira, GitHub, MS Project, PowerBI

Languages

- English - Fluent
- Italian - Intermediate
- Spanish - Native
- Catalan - Native

Work Experience

Global Product Manager - UPS Digital Services

 ABB, Quartino, Switzerland | October 2024 - Present

- Manage a portfolio of 5+ digital and SaaS solutions for connectivity and monitoring, coordinating 4 cross-functional teams across EMEA, Americas, and India.
- Contribute to product strategy by analyzing market and usage data, identifying opportunities to integrate AI-driven insights into the product portfolio.
- Led the transformation of a monitoring solution into a predictive fleet management offering — defining user journey maps, coordinating execution, and running pilot tests with KPI tracking.
- Enable 10+ sales and technical teams through training and positioning, while partnering with global stakeholders to align roadmap priorities.

Product Manager - SaaS solutions

 Ponera Group, Lugano, Switzerland | June 2023 - October 2024

- Led end-to-end development and launch of 4 IoT-enabled SaaS products as Product Owner, from discovery through deployment, serving 100+ connected assets across multiple customer environments
- Defined product vision, roadmap, and functional requirements, coordinating cross-functional teams of internal stakeholders and external software providers to translate business needs into scalable digital solutions
- Managed a network of 5+ technology and hardware vendors, leading RFP/RFQ processes and commercial negotiations to align solutions with business, technical, and budget objectives
- Directed product governance and stakeholder/CEO alignment across multiple parallel initiatives, evaluating IoT, AI and operational data models to improve asset monitoring and drive automation opportunities that enhanced operational efficiency

Project Manager - Data & Digital Projects

 Randstad, Ghent, Belgium | March 2022 - June 2023

- Led cross-functional teams delivering data analytics, machine learning, cloud, and embedded software projects for external clients, translating business requirements into technical specifications and delivery plans
- Owned backlog prioritization and stakeholder communication across multiple concurrent initiatives, balancing client business needs with technical feasibility and delivery constraints
- Supported the implementation of data-driven solutions to improve operational efficiency and business decision-making, working closely with data and engineering teams to define requirements
- Established KPI-driven reporting and risk management practices, ensuring delivery governance and successful project outcomes across 2 client engagements

ANDREU ORTEGA BLASI

Product Manager | AI, SaaS & Digital Solutions

Software Engineer

 ToBelT, Barcelona, Spain | September 2020 – July 2021

- Developed Python-based RPA automation solutions for 3 business processes, reducing manual workload and improving operational efficiency
- Collaborated with business stakeholders to translate operational requirements into scalable software solutions, contributing across the full development lifecycle from design to deployment
- Designed databases and data pipelines supporting internal applications and reporting systems, enabling more reliable data access for business decision-making

AI Product & Applied GenAI Projects

Developed hands-on expertise in Artificial Intelligence and Generative AI product development, with a focus on practical implementation and real-world business applications. These are some example projects I have worked on:

- | | | |
|---|---|---|
| RAG-based chatbot | { | • Developed and deployed an agentic RAG-based chatbot that provides contextual answers about my own professional experience. |
| | | • To test it visit this site or test it on telegram |
| | | • To review how I did it, check the github repository . |
| AI-assisted Coin Collection Management SaaS | { | • Used Claude Code to fully develop a coin collection management with an AI-assited chatbot. Additionally, I've created a set of Claude Skills to simulate a professional development team solution and to create rigorous project documentation. |
| | | • To test it visit this site . |
| | | • To review how I did it, check the github repository . |
| LLM Evaluation & Quality Framework | { | • Designed an evaluation framework to assess LLM/RAG output quality using measurable criteria (accuracy, completeness, hallucination rate, and relevance), reducing manual evaluation time by up to 20%. |
| | | • Built a testing dataset and scoring workflow to support model selection decisions and ensure reliability for enterprise use cases. |
